Partnership Bonus is lower

- Board has decided to retain a greater proportion of profit to strengthen our balance sheet. The reasons are:
  - Our total debts have increased to more than 4 times our annual cash flow and we need that to come down to around 3 times
  - The outlook remains volatile and uncertain due to the economy and pace of change in retail
  - Determination to accelerate our plans for the future - maintaining levels of investment even if conditions get tougher and covering costs of organisational changes
Continued investment in Partners

- Pay for Performance
- Ensure Partners’ pay remains well above the National Living Wage
- Average increase of 5.0% in pay rates for our non-management Partners
- Above market pension offer

Looking ahead

- Starting from a position of strength
- Trading pressures will continue as a result of wider changes taking place in retail
- Rate of change in selling prices likely to be significantly slower than rate of change in input costs as a result of weakness in Sterling exchange rate
- Expect both inflationary cost pressures and competition to intensify in the market
- Accelerating aspects of our strategy to ensure the Partnership’s success
- Expect significant one-off costs of change to impact short-term profits
